Description			
Hello,			
I have heard lots of good things about this code. I have currently tried it on Win7HP and WinXPH but in both cases I see the error below.			
<pre>C:\SpectrumAnalyser>rtl_sdr /tmp/capture.bin -s 1.8e6 -f 392e6 Found 1 device(s): 0: ezcap USB 2.0 DVB-T/DAB/FM dongle Using device 0: ezcap USB 2.0 DVB-T/DAB/FM dongle usb_claim_interface error -12 Failed to open rtl_sdr device #0. C:\SpectrumAnalyser></pre>			

Best regards, John.			

History

#1 - 05/19/2012 02:13 PM - JohnO

The ezcap device works fine as a TV receiver.

#2 - 02/20/2016 08:21 PM - laforge
