<b>Target version:</b>	
<b>Spec Reference:</b>	
<b>Description</b>	
<p>Downlink power control is not implemented. GPRS optionally allows for downlink PDTCH power control in order to reduce interference with surrounding cells on same / neighboring ARFCN.</p> <p>DL power control is complicated by the fact that we cannot only use the power to reach the MS that we want to send the MAC block to, but we also have to consider all the other MS for whom the USF is relevant.</p>
