Description

Dear Members,

I am attaching a gtp-u patch for OVS 2.5 which was authored by Niti. I am trying to test the patch but I could not do it successfully. I am attaching the patch in this email. If there is someone out there who had already tried and tested the patch, please let me know. Also people interested in this can work on this as Linux kernel now has support for gtp-u tunneling. Also this patch could be ported to OVS version 2.6

If some one needs some kind of help on how to apply this patch, contact me as I have applied it successfully but not tested it.

History

#1 - 10/27/2016 08:56 AM - laforge

- Project changed from Cellular Network Infrastructure to Linux Kernel GTP-U
