

OsmoPCU - Bug #1957

Fix calculation of absolute frame number from relative frame number (RACH)

02/22/2017 12:42 PM - dexter

Status: Closed	Start date: 02/22/2017
Priority: Normal	Due date:
Assignee: dexter	% Done: 100%
Category:	
Target version:	
Spec Reference:	
Description A RACH request that is forwarded to the PCU (usually) contains only a relative frame number. When a RACH request is processed by the BTS class, the absolute frame number is calculated from the relative framenumber. The current implementation lacks the handling of cornercases and race conditions.
