

OsmocomBB - Bug #1990

bb nand flash

03/30/2017 05:31 AM - yangkkokk

| | | | |
|---|----------------------|------------------------|------------|
| Status: | Feedback | Start date: | 03/30/2017 |
| Priority: | Normal | Due date: | |
| Assignee: | yangkkokk | % Done: | 0% |
| Category: | OsmocomBB HW Drivers | | |
| Target version: | | | |
| Resolution: | | Spec Reference: | |
| Description | | | |
| I ported Fatfs, but the flash drive is missing annotations Http://git.osmocom.org/osmocom-bb/tree/src/target/firmware/flash/cfi_flash.c | | | |
| <pre>DSTATUS disk_initialize (BYTE); DSTATUS disk_status (BYTE); DRESULT disk_read (BYTE, BYTE *, DWORD, BYTE); DRESULT disk_write (BYTE, const BYTE *, DWORD, BYTE); DRESULT disk_ioctl (BYTE, BYTE, void *);</pre> | | | |
| So, I hope to do some of the code of the Notes, or into a new structure, after all, many people like the simple and clear secondary development. | | | |
