<b>Target version:</b>	
<b>Spec Reference:</b>	
<b>Description</b> sccp-addresses consist of a number of components. A presence bitmask denotes if a component has a valid value or not. Add a function that checks the presence field against a given value. Also check if the values fall into the correct range, so that a malformed sccp-address is detected early.	

### History

---

#### #1 - 08/01/2017 12:12 PM - dexter

- Status changed from New to In Progress

#### #2 - 08/01/2017 01:34 PM - dexter

- Status changed from In Progress to Resolved

- % Done changed from 0 to 100

Patch is up for review: <https://gerrit.osmocom.org/#/c/3398/>
