

OsmoMSC - Feature #2487

MSC side of LCLS (local call local switching) as per the 3GPP specs

09/03/2017 05:37 PM - laforge

Status: New	Start date: 09/03/2017
Priority: Normal	Due date:

Category:	Estimated time: 0.00 hour
Target version:	
Resolution:	
Description 3GPP LCLS allows the media stream of a call to remain locally at the BTS, if both legs of a call are within the same BTS. We should implement this in OsmoMSC, if not only to test the OsmoBSC side which we want to implement, too.
