

OsmoMGW - Bug #2652

osmo-mgw doesn't reject early bidirectional mode

11/18/2017 08:06 PM - laforge

Status: Resolved	Start date: 11/18/2017
Priority: Low	Due date:

Category:	
Target version:	
Description It's illegal to activate a connection with "sendrecv" in the CRCX. The rationale is quite simple: if only the MGW-side port/ip information is known, how can there be bi-directional audio? osmo-mgw needs to reject this with error 527. the osmo-ttcn3-hacks test case "TC_crcx_early_bidir_mode" tests this (and fails ever since it has been created in September).
