- % Done changed from 0 to 100

Completed today. The only trouble was that I was using upstream patchwork, being unaware that there were other forks around and that we were using one. This created weird issues during "manage.py migrate" until I realized what was going on.

Dockerfiles now at   https://gerrit.osmocom.org/#/c/docker-playground/+/9136/

Side note: It's sad that the freedesktop.org fork doens't even state on the web pages it's serving that it's a non-master/mainline version :(
