

OsmoBSC - Bug #3112

Clean up / fix osmo_bsc_filter.c

03/26/2018 01:25 PM - dexter

Status: Resolved	Start date: 03/26/2018
Priority: Low	Due date:
Assignee: dexter	% Done: 100%
Category:	
Target version:	
Spec Reference:	
Description	
<p>There are some leftovers from the time where osmo-bsc had an SCCPLITE/IPA based A interface. There is still an msc_con->is_connected and an msc_con->is_authenticated flag which is hard coded to 1. These flags are used by osmo_bsc_filter. Presumably the functionality in osmo_bsc_filter is presumably broken. We need to look into this and either fix it or remove it.</p> <p>See also osmo_bsc_msc.c data->msc_con->is_connected = 1; data->msc_con->is_authenticated = 1;</p>

I have checked back on the status of osmo_bsc_filter.c. It is already cleaned up.

The struct member data->msc_con->is_authenticated = 1 is already there. I have removed it now:

<https://gerrit.osmocom.org/c/osmo-bsc/+/15007> bsc_msc_data: remove unused member is_authenticated
