

libosmocom - Bug #3124

rename CELL_IDENT_LAI_AND_LAC to CELL_IDENT_LAI

03/29/2018 02:41 PM - stsp

Spec Reference:			

Description

The constant CELL_IDENT_LAI_AND_LAC is part of an enum defined in include/osmocom/gsm/protocol/gsm_08_08.h. "LAI and LAC" is a misnomer.

Quoting Neels in <http://lists.osmocom.org/pipermail/openbsc/2018-March/011862.html>:

```
A "LAI" is by definition a PLMN (MCC+MNC) plus a LAC.  
So saying "LAI and LAC" is like saying "My family and my brother".
```

```
I think we should rename it and have a backwards compat:  
#define CELL_IDENT_LAI_AND_LAC CELL_IDENT_LAI
```
