Target version:	
Spec Reference:	
Description we have GSUP specs in the osmo-gsm-manuals, but they are common chapters included in various usermanuals, i.e. somewhat hidden. Maybe we should instead publish the GSUP specs as a distinct PDF so that it is more visible?

i am not completely sure which project/repo this should go into:

- the asciidoc is currently in osmo-gsm-manuals
- the code is in libosmocore gsm and in osmo-hlr.

where do we want the pdf to be generated? in the manuals project or in libosmocore?
