

OsmoBSC - Bug #3243

there is MGW config for each separate 'msc', but the MGW settings are stored only once globally

05/07/2018 03:10 PM - neels

Description	
<p>In osmo-bsc.cfg, the MGW is configured in the 'msc' subsections. There can be any number of MSCs, each with a different MGW config, but since the MGW config is stored in gsm_network, the last one wins.</p> <p>What is the intention here, allow a separate MGW for each MSC? In that case we should move the MGW config from gsm_network to bsc_msc_data.</p> <p>Or should the BSC have a single MGW? In that case we should deprecate the MGW config under 'msc' and move it to 'network'.</p>
