

OsmoBSCNAT - Feature #3336

osmo-bsc-nat: Add command to show current status of a given BSC (or list of them)

06/12/2018 01:21 PM - pespin

Status:	Resolved	Start date:	06/12/2018
Priority:	Normal	Due date:	
Assignee:	pespin	% Done:	100%
Category:			
Target version:			
Description			
Show whether it is connected or not, whether it is authenticated, and parameters of the BSC like the jitterbuffer min max values used.

#1 - 06/13/2018 02:04 PM - pespin

It seems we already have some minimal support for this kind of stuff in sh bsc config:

```
OsmoBSCNAT# sh bsc config
BSC token: 'foo' nr: 0
  paging forbidden: 0
  description: whatever
BSC token: 'bar' nr: 1
  access-list: acceptwhatever
  paging forbidden: 0
  description: some-description
```

It would be nice to see if we can print this only for 1 specific bsc, inside its own subnode (eg. bsc 1), or by passing a the Nr as a parameter: sh bsc config N

Then we'd need to add at least state of jitterbuffer, connection status, etc.

#2 - 06/27/2018 05:33 PM - pespin

- Status changed from New to Feedback

- % Done changed from 0 to 90

A new command superseding old ones has been added in <https://gerrit.osmocom.org/#/c/openbsc/+9755/>

show bsc status all: will show all configured bsc status and statistics

show bsc status nr 0: will show status and statistics for bsc nr 0 (if found).

show bsc status token abcd: will show status and statistics for bsc with token abcd (if found).

show bsc status lac 1234: will show status and statistics for bsc with handling LAC 1234 (if found).

#3 - 07/02/2018 10:07 AM - pespin

- *Status changed from Feedback to Resolved*

- *% Done changed from 90 to 100*

Merged, closing.
