

libosmocore - Bug #3640

Logging broken in network:osmocom:latest builds

10/09/2018 09:42 PM - daniel

Status: Resolved	Start date: 10/09/2018
Priority: High	Due date:
Assignee: pespin	% Done: 100%
Category:	
Target version:	
Spec Reference:	
Description	
Filtering by log level is broken in the current libosmocore latest packages (Tried with Debian 9)	
As soon as you set logging level all <something> there is no way to go back to category-based log levels.	
But since "logging level all everything" is deprecated the only way to set tar->loglevel back to 0 is to destroy the log context and recreate it. This is unintuitive and the logging set-all patches from master should be included in a new release soon.	

History

#1 - 12/11/2018 12:06 PM - pespin

- Status changed from New to Feedback
- Assignee set to pespin
- % Done changed from 0 to 90

Neel's patches modifying the logging subsystem were merged a while ago, this issue can be closed once we generate next release (currently we are at libosmocore 0.12.0, so probably fixed when 0.13.0 is released.)

#2 - 02/06/2019 05:45 PM - pespin

- Status changed from Feedback to Resolved
- % Done changed from 90 to 100

New releases were generated, closing.
