Spec Reference:	
Description	
<p>The function <code>log_set_filter_bsc_subscr</code> is called by vty command "logging filter imsi <imsi>". This function calls <code>bsc_subscr_get</code> which is necessary so we don't loose/free the subscriber and forget the filter state.</p> <p>However, it seems that the subscriber is never put() again:</p> <pre>OsmoBSC# show subscriber all IMSI TMSI LAC Use 901700000023361 0122b2d3 1 8 OsmoBSC# logging filter imsi 901700000023361 OsmoBSC# logging filter imsi 901700000023361 OsmoBSC# logging filter imsi 901700000023361 OsmoBSC# logging filter imsi 901700000023361 OsmoBSC# show subscriber all IMSI TMSI LAC Use 901700000023361 0122b2d3 1 12 OsmoBSC# logging disable OsmoBSC# show subscriber all IMSI TMSI LAC Use 901700000023361 0122b2d3 1 12</pre>
