

OsmoMSC - Bug #3880

GSUP MT-ForwardSM Message Reference - wrong value in a response

04/01/2019 07:47 AM - efistokl

Status:	New	Start date:	04/01/2019
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SMS		
Target version:			
Resolution:			
Description			
<p>The Message Reference that comes in GSUP message is not used and the GSUP response for the SMS contains the wrong Message Reference which is assigned by MSC, hence the HLR/SMSC (or whatever on the other side of the GSUP connection is) isn't able to correlate the request and the response.</p>
