

osmo-remsim - Feature #3886

expose ICCID or even IMSI of all cards on remsim-server

04/01/2019 07:25 PM - laforge

Status:	New	Start date:	04/02/2019
Priority:	Normal	Due date:	04/02/2019
Assignee:	laforge	% Done:	0%
Category:	remsim-server		
Target version:			
Description			
It would be great if the remsim-server could show an inventory of all cards inserted in each bank, including information such as the ATR, ICCID and IMSI.			
This means that the bankd initially has to open each slot/card and acquire this information, even before any remsim-client attaches to that card. The information then has to be provided via RSPRO to remsim-server, who will have to show it on the REST/JSON interface.			
This requires the architectural changes of #3884
