

osmo-remsim - Bug #3890

TTCN3 remsim test suite is not yet automatically executed

04/01/2019 07:36 PM - laforge

Status:	New	Start date:	04/01/2019
Priority:	Normal	Due date:	
Assignee:	laforge	% Done:	0%
Category:	tests		
Target version:			
Description			
<p>We need to automatically execute the existing test suite against the osmo-remsim components.</p> <p>This includes executing on a build slave with physical SIM card access (e.g. the one we use for pysim related tests?) and also one with a SIMtrace or sysmoQMOD device so we can test the related functionalities in client + bankd.</p> <p>Alternatively, one could start to emulate the cardem firmware or a CCID reader in order to execute the tests in a fully virtual environment. The advantage would be software-induced changes such as card insert/removal and not having to wait for a modem to reboot in order to talk to the SIM, ...</p>
