Category:			
Target version:			
Spec Reference:			
Description			
<p>Right now we have a copy of several scripts used by osmo-gsm-tester to gain root access for certain specific tasks through sudo. They are maintained in osmo-gsm-tester.git/util/osmo-gsm-tester*:</p>			
<pre>ls -l utils/osmo-gsm-tester* utils/osmo-gsm-tester_netns_exec.sh utils/osmo-gsm-tester_netns_setup.sh utils/osmo-gsm-tester_setcap_net_admin.sh utils/osmo-gsm-tester_setcap_net_raw.sh</pre>			
<p>We currently have a copy of those scripts in osmo-ci.git under "ansible/roles/gsm-tester/files". We should modify ansible scripts to download osmo-gsm-tester.git to /root and copy the files from there to /usr/local/bin, then drop the copies we have in osmo-ci.git.</p>
