Target version:			
Spec Reference:			

Description

The TTCN3 log output that the tester currently delivers is not formatted. This means one has to format it manually before it can be viewed. Since we already do the logmerge directly on jenkins we could do the formatting as well. Then inspection of the build artifacts would be a lot easier.

Example commandline:

```
ttn3_logformat ./MSC_Tests.TC_lu_and_mt_call.merged > formatted.log
```

(Attached one finds the two files from the example)

Files

MSC_Tests.TC_lu_and_mt_call.merged	104 KB	04/11/2019	dexter
formatted.log	129 KB	04/11/2019	dexter
