

SIMtrace 2 - Bug #4041

implement SIMTRACE_CMD_BD_BOARD_INFO

06/04/2019 03:57 PM - laforge

Status: New	Start date: 06/04/2019
Priority: Normal	Due date:
Assignee: laforge	% Done: 20%
Category: firmware	
Target version:	
Spec Reference:	
Description this command is supposed to return the hardware manufacturer, hardware version as well as software version information. It would be very useful to obtain the currently running firmware version as well as other details.	
Related issues: Related to SIMtrace 2 - Feature #1460: include some version information / neg... New

- % Done changed from 0 to 20

with <https://gerrit.osmocom.org/c/simtrace2/+/15066> it will be possible to get hardware serial (e.g. device id) and firmware version using lsusb.

this is in addition to SIMTRACE_CMD_BD_BOARD_INFO (not implemented yet), while being easier to use (no need for a dedicated host software just to get the information).
