<b>Description</b>			
Hi,			
I am in the process of making a scanner using a Raspberry Pi with OP25 on it. I have a touch screen which allows me to use the scanner without a need of a mouse.			
I am using OP25 for 6 months and really loves the software. Unfortunately, the user interface (UI) is a bit crude and there is no way to view this on a vertical screen (480 x 320).			
What I wanted to know is to see if you can maybe update OP25 with a version that can work on a vertical screen (like a scanner). I know I am not the only one dealing with this issue.			
Thanks!
