Target version:			
Spec Reference:			
Description			
Right now we don't yet support setting OPC in the HSS for 4g (srsEPC). Initial work in done in pespin/3g branch where WIP support to add 3G stuff is being done.			
Since in this case srsUE is responsible to use the algo from a config file, we don't need any simcard setup, only make it available in resource.py and schema.py and add support for it in srsepc.py and its template file.
