

Osmocom.org Servers - Bug #4862

replicate download.opensuse.org content somewhere on *.osmocom.org

11/18/2020 03:04 PM - laforge

Status: Stalled	Start date: 11/18/2020
Priority: Normal	Due date:
Assignee: laforge	% Done: 0%
Category:	
Target version:	
Spec Reference:	
Description as we can see right now. {download,mirrors,build}.opensuse.org are all down. This means we can not build any of our container images, nor can any users install pre-built osmocom patches. We should at least have an alternative mirror on osmocom.org.	

History

#1 - 11/18/2020 03:16 PM - laforge

<https://ftp.uni-stuttgart.de/opensuse/repositories/network:/osmocom/> seems to be a current mirror, in case anyone needs it.

#2 - 11/18/2020 04:59 PM - pespin

See patch:

<https://gerrit.osmocom.org/c/docker-playground/+/21239> common: Introduce OSMOCOM_REPO_MIRROR param

With it, one can for instance:

```
cd ttcn3-pcu-test
```

```
OSMOCOM_REPO_MIRROR="http://ftp.uni-stuttgart.de/opensuse" ./jenkins.sh
```
