

osmo-remsim - Bug #5187

osmo-remsim packages in -latest missing systemd initscripts

06/20/2021 10:28 PM - roh

Status:	In Progress	Start date:	06/20/2021
Priority:	Normal	Due date:	
Assignee:	osmith	% Done:	70%
Category:			
Target version:			
Spec Reference:			
Description			
the packages in the -latest feeds for (atleast) debian 10 are missing systemd scripts and config snippets.			
the packages in -nightly have atleast systemd scripts, but no config snippets.			
making sure /etc/osmocom is there and atleast a stub bankd_pcsc_slots.csv would help a lot.			
change the default ip for the server-ip in bankd defaults to 127.0.0.1 instead of a 10.9.x.y default			
tested with osmo-remsim-server and osmo-remsim-bankd on amd64

Revision debcd86e - 06/22/2021 03:06 PM - osmith

etc_default: change bankd, client ip to 127.0.0.1

Related: OS#5187

Change-Id: I8dffe950b0f041a231708521d11b027bfd304e3

History

#1 - 06/22/2021 03:45 PM - osmith

- Checklist item [x] making sure /etc/osmocom is there and atleast a stub bankd_pcsc_slots.csv added
Checklist item [x] change the default ip for the server-ip in bankd defaults to 127.0.0.1 instead of a 10.9.x.y default added
Checklist item [] get it into latest (new release / backport?) added

- Status changed from New to In Progress

- Assignee set to roh

- % Done changed from 0 to 70

Patches: <https://gerrit.osmocom.org/q/topic:remsim-install-examples>

To get it into latest, either a new release needs to be made or these patches + the ones adding systemd service files need to be backported.

[roh](#), assigning to you, what makes more sense?

- Assignee changed from roh to osmith

i think a new release would be nice.

updated osmo-remsim depends on updated simtrace2, depends on updated libosmocore. So we will have to tag releases for at least those to facilitate that. I've asked on IRC if anyone knows reasons for not tagging a new libosmocore release at the moment.
