Description			
Hello,			
This these are more housekeeping meta-bugs so perhaps they don't belong here. Let me know if there is a better spot.			
1. The Git address in the wiki page has a typo in it ("gbprxoy"):			
<pre>git clone git://git.osmocom.org/osmo-gbprxoy.git</pre>			
2. There is not a GitHub mirror for this project. Maybe this is intentional but I think it is because it was recently split into its own repo and perhaps that mirror list or automation not updated.			
Regards, -Michael
