

OsmoPCU - Bug #1624

add CRBB support to write_packet_ack_nack_desc_egprs

02/25/2016 05:23 PM - msuraev

Status:	New	Start date:	02/25/2016
Priority:	Normal	Due date:	
Assignee:	sysmocom	% Done:	0%
Category:			
Target version:			
Spec Reference:			
Description			
According to TS 44.060 §12.3.1 EGPRS Ack/Nack Description can use compressed block bitmaps. At the moment there is todo code plug which forces use of URBB makes coverity unhappy (CID 1351734). Note: this would require extending osmo_t4_encode() into proper encoder with backtracking instead of current "best guess" approach.			

History

#1 - 10/20/2016 06:36 AM - arvind.sirsikar

- Assignee set to arvind.sirsikar

We are working on CRBB support as well as window scaling for EGPRS for UL TBF.

#2 - 10/20/2016 06:36 AM - arvind.sirsikar

- Status changed from New to In Progress

#4 - 08/17/2017 06:53 AM - laforge

- Assignee changed from arvind.sirsikar to sysmocom
