

Cellular Network Infrastructure - Feature #1651

document the control interface(s) of the various programs

03/11/2016 09:40 AM - laforge

Status: Closed	Start date: 03/11/2016
Priority: High	Due date:

Category:	
Target version:	
Spec Reference:	
Description Now that we have documentation for the Abis and Gb interfaces, it would be great to also document the control interface of every Osmo* process. The documentation should probably be part of the respective programs user manual, rather than a separate manual.	
Related issues: Related to Cellular Network Infrastructure - Feature #1700: Document existing... Feedback 05/04/2016 Blocked by libosmocore - Bug #1730: control interface: read rate counters does... Closed 05/19/2016

Shall we also document all the individual (rate) counters available via ctrl interface?

#5 - 05/09/2016 01:58 PM - msuraev

- Related to Feature #1700: Document existing statistics/counters of OsmoNITB, OsmoSGSN, OsmoBTS, OsmoPCU added

#6 - 05/09/2016 11:05 PM - laforge

Hi Max,

yes, though I think that belongs to the "KPI" related tickets, not in this one. It should be sufficient to document how (rate) counters can be read by the control interface in general, with a few examples.

The actual counters available in each program are then documented as part of the respective "KPI" ticket.

The current version is available in max/ctrl branch of osmo-gsm-manuals repo.

In that branch I could only find a single commit adding the OsmoBSC snippet of a few lines. Please check if you have some local commits for all the other programs pending? Where is the related documentation?

#10 - 06/01/2016 02:08 PM - msuraev

I've force-pushed it - there should be 5 commits with additions for different manuals.
