Define how to handle logging and which fields to include.

[laforge](#), [keith](#):

- Which additional log messages would be useful and which fields should they have?
- Are there missing fields in existing messages?
- Is there unhelpful information that we should not display at all or only output when increasing the log level?

It should be call + leg. Right now it is only leg.

- Do you guys want an additional log message when a call has been initiated?
- Which other call related log messages would be helpful?
