| Description | | | |
| We have so far used m3ua-testtool to check our M3UA SG (server) implementation. We have not yet tried to validate the M3UA ASP (client) side implementation. I'm sure there are bugs to be found... | | | |

- Assignee set to stsp

this relates to <https://jenkins.osmocom.org/jenkins/view/TTCN3/job/nplab-m3ua-test/> which we run against osmo-stp, which uses our STP side M3UA implementation. However, the test suite in <http://git.osmocom.org/nplab/m3ua-testtool/> can just as well validate the ASP side, which we could test against m3ua-testtool
