Description	
<p>The version of the osmo-nitb in the 'latest' repository on download.opensuse.org is built from the release tag 1.0.0 which is earlier than https://git.osmocom.org/openbsc/commit/?id=5825e5cfb245f32a409c7784e51fb1e774adf799 which fixes the below:</p> <p>This is output to the log at regular intervals:</p> <pre>DDB <000d> db.c:190 DBI: -6: An invalid or out-of-range index was passed to libdbi DDB <000d> backtrace.c:45 backtrace() returned 11 addresses [snip]</pre> <p>Suggested action: TAG the a release (1.0.1) post commit 5825e5cfb245f32a409c7784e51fb1e774adf799</p> <p>Question: Will tagging a release result in a automatic build of the new version in 'latest'?</p>
