

osmo-gbproxy - Bug #3177

gbproxy: gprs_gb_parse_dtap doesn't handle AUTH & CIPHER REQUEST messages

04/16/2018 04:19 PM - pespin

Status: New	Start date: 04/16/2018
Priority: Low	Due date:
Assignee: pespin	% Done: 0%
Category:	
Target version:	
Spec Reference:	
Description	
While running osmo-gbproxy 8343b4adbbe9afd4294232429696ee9736ec1004 today, I saw this log line:	
<pre><0012> gprs_gb_parse.c:384 Unhandled GSM 04.08 message type AUTH & CIPHER REQUEST for protocol discriminator GMM.</pre>	
I could not gather more info since I had enabled debug all and my terminal buffer overflowed quickly.	
So it seems GSM48_MT_GMM_AUTH_CIPH_REQ message is not being handled in gprs_gb_parse_dtap().
