

Cellular Modem Information - Feature #3658

Create a "osmocom-bb-host-latest" docker container

10/16/2018 02:11 PM - osmith

Status: New	Start date: 10/16/2018
Priority: Low	Due date:
Assignee:	% Done: 0%
Category:	
Target version:	
Spec Reference:	
Description The ttcn3-bts-test-latest jenkins job should use the "latest" version of everything that is used for the test. But since there is no "latest" tag in the osmocom-bb.git repository, we can't build a osmocom-bb-host-latest docker image. The current workaround is using osmocom-bb-host-master for ttcn3-bts-test-latest.

- Priority changed from Normal to Low

I don't think we ever had OsmocomBB releases, so this will be hard. Given the limited amount of changes in recent years, there's also no urgent need as master is very stable (i.e. no changes happening)
