

Cellular Network Infrastructure - Bug #3661

latest stable packages report "UNKNOWN" as version string in --version

10/17/2018 09:56 AM - osmith

Status:	New	Start date:	10/17/2018
Priority:	Urgent	Due date:	
Assignee:	osmith	% Done:	0%
Category:			
Target version:			
Spec Reference:			
Description			
A jenkins job was implemented in #3555 to check for "UNKNOWN" in the --version output, and it is running through for nightly. But in "latest stable" it is failing.			
Example: https://jenkins.osmocom.org/jenkins/job/Osmocom-Debian-install-latest/43/console			
Slightly off topic: right now nobody receives notifications if the -latest or -nightly job fails, should we change this (after the issue is fixed)?
