Description	
There's bug report that GPRS becomes unusable if MS stays idle for 30 seconds and than try to use it again. We should add corresponding test case to cover this: <ul style="list-style-type: none">• use GPRS (ping?)• sleep for 1 minute• use GPRS again

Created test in following commit:

<https://gerrit.osmocom.org/#/c/osmo-gsm-tester/+11853> suites: gprs: Add test to verify MS can use gprs after long idle time

I tested in in RnD and everything seems to be working fine. ping after 60 idle seconds is working.
