

OsmoMSC - Feature #3918

work-around spec-incompliant MMEs that specify MME Name as string

04/12/2019 08:31 AM - laforge

Status:	Resolved	Start date:	04/12/2019
Priority:	Normal	Due date:	
Assignee:	dexter	% Done:	100%
Category:	SGs Interface		
Target version:			
Resolution:			
Description			
Despite TS 29.118 being very clear that the MME name IE has to be formatted as a DNS name with "labels", some other implementations insist on sending the MME name as a string representation with dots.			
This issue is hence about creating a work-around for such noncompliant implementations.			

History

#1 - 04/12/2019 11:06 PM - oramadan

<https://gerrit.osmocom.org/#/c/osmo-msc/+13627/>

#2 - 04/23/2019 12:24 PM - dexter

The patch from omar is merged. However, we should consider a TTCN3 test for this.

#3 - 05/08/2019 09:48 PM - laforge

- Subject changed from *work-around spec-incompliant MMEs that specify MME Name as string* to *work-around spec-incompliant MMEs that specify MME Name as string*

- Status changed from *New* to *Resolved*

- % Done changed from *0* to *100*

patch has been merged quite some time ago.
