

## OsmoBTS - Bug #4031

### OML part of BTS has no TTCN-3 tests

05/29/2019 02:15 PM - laforge

<b>Status:</b> New	<b>Start date:</b> 05/29/2019
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 20%

<b>Target version:</b>	
<b>Spec Reference:</b>	
<b>Description</b> While the RSL part of OsmoBTS has pretty good TTCN-3 test coverage, the OML part doesn't really have any [direct] testing. We always use OsmoBSC to initialize OML of the BTS instead. That was good to get the RSL tests going, but we need actual OML test coverage.

ttcn3-bts-test: Execute OML tests without BSC

Run the testsuite one more time; this time for OML tests which require us to run without a BSC. We can run those with trxcon and osmo-bts-trx and don't need virtphy for them.
