

OsmoSGSN - Bug #44

TLLI clash possible

02/19/2016 10:47 PM - zecke2

Spec Reference:			

Description

When we look-up the LLC-LLE we will convert from Foreign to Local TLLI and this might cause a 'clash' (in case a public net has allocated the same P-TMSI as we allocate).

We should somehow use the 'full' TLLI for look-up and remember why/how we created the LLC-LLE (in case of different life-time) and maybe (if possible) assign a new TLLI (probably not possible).

The probability of this event to happen is quite low.
