

## rtl-sdr - Bug #4720

### rtl\_power reports invalid values

08/18/2020 08:59 PM - sdall2000

<b>Status:</b> New	<b>Start date:</b> 08/18/2020
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b>	
<b>Target version:</b>	
<b>Spec Reference:</b>	
<b>Description</b>	
Ran the following command: rtl_power -f 433M:434M:10K	
Many of the returned power values show as "-1#J". See the attached capture.	
This was run on Windows 10 with both the 32 and 64 bit versions of rtl-sdr, from the 20200816 date stamped Windows builds from here: <a href="https://ftp.osmocom.org/binaries/windows/rtl-sdr/">https://ftp.osmocom.org/binaries/windows/rtl-sdr/</a>	
Note that I saw similar issues on my Raspberry Pi. However, after building rtl-sdr from this repo: <a href="https://github.com/keenerd/rtl-sdr">https://github.com/keenerd/rtl-sdr</a> , it seemed to work fine.	

#### History

#1 - 08/19/2020 02:47 PM - JayMore

Same here, with Windows 7 32b package (rtl-sdr-32bit-20200816.zip )  
Dongle is RTL-SDR.COM v3.
