

## Osmocom.org Servers - Bug #4778

### Update <https://osmocom.org/> to use https: in "other web sites"

10/03/2020 04:19 PM - rousseau

<b>Status:</b>	In Progress	<b>Start date:</b>	10/03/2020
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	laforge	<b>% Done:</b>	60%
<b>Category:</b>			
<b>Target version:</b>			
<b>Spec Reference:</b>			
<b>Description</b>			
The page at <a href="https://osmocom.org/">https://osmocom.org/</a> contains:			
Please also see the following other web sites which are not integrated into redmine:			
Our Mailing list server at <a href="https://lists.osmocom.org/">https://lists.osmocom.org/</a>			
Our git repositories with web interface at <a href="http://git.osmocom.org/">http://git.osmocom.org/</a>			
Our planet (blog aggregator) at <a href="http://planet.osmocom.org/">http://planet.osmocom.org/</a>			
Personal files of individual developers at <a href="http://people.osmocom.org/">http://people.osmocom.org/</a>			
I propose to replace the http: by https: to improve security.			
It works fine for <a href="https://git.osmocom.org/">https://git.osmocom.org/</a> & <a href="https://people.osmocom.org/">https://people.osmocom.org/</a>			
The TLS certificate of <a href="https://planet.osmocom.org/">https://planet.osmocom.org/</a> expired in 2010 (10 years ago :-)			

#### History

##### #1 - 10/03/2020 09:09 PM - laforge

- Status changed from New to In Progress
- Assignee set to laforge
- % Done changed from 0 to 60

Thanks, that text dates back some years.

I've now changed the URLs for git + people. For the planet (whici is in rather unmaintained/broken state), we first have to resurrect it and get it a proper Let's Encrypt certificate before I can change the URL.
